EXAMINER'S COMMENT

INVENTORSHIP

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

REASONS FOR ALLOWANCE

2. Claims 45-76 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 45, 75, 76 and their extended claims is the claimed subject matter regarding "a filter element for obtaining a filtered differential signal by filtering the positive differential signal; wherein the air-mass sensor signal is used as a controlled variable if one of the positive differential signal and the filtered differential signal falls below a predefined threshold value, and wherein the first auxiliary signal is used as the controlled variable if one of the positive differential signal and the filtered differential signal exceeds the predefined threshold value" which the prior art of references did not disclose.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
